

ABOUT US

MAF Construction Services is a family building firm with a strong team of building industry professionals including managers, tradesmen and apprentices.

As a contractor we have considerable experience and expertise ranging across the private and commercial sectors.

In particular, we have proven strengths in the delivery, planning, financial management and problem-solving that is required to ensure building projects are successful. We are very proud of our commitment to delivering projects of any size, with a personal service, on time and on budget.

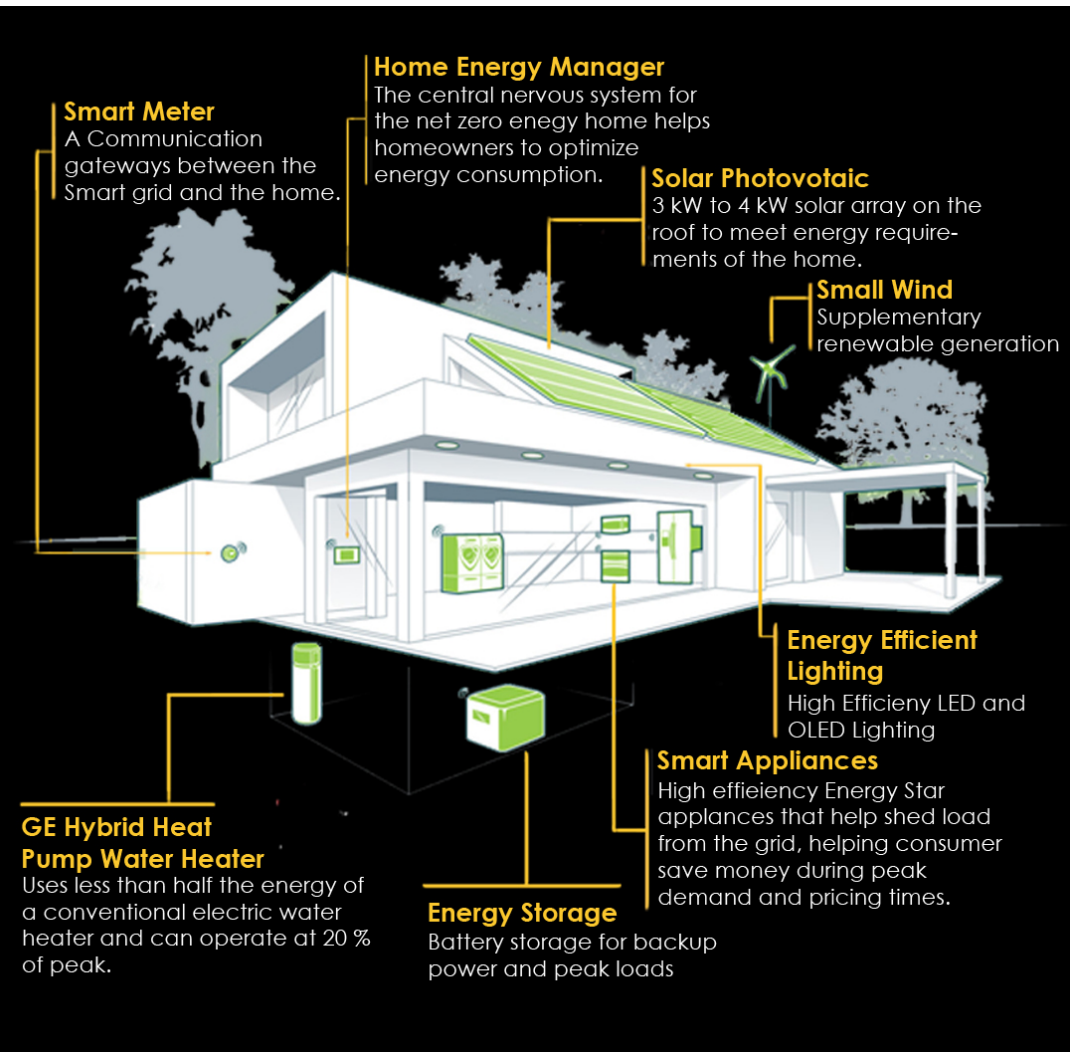

MAF Construction Services was established in 2015, the firm is laid on the foundations of its employees who have many years experience and expertise in the industry.

We don't however, do it alone we utilize the knowledge and skills of our network of local consultants, specialists and suppliers to strengthen our service.

CEO Message :

My aim to invest in developing products that help our customers reach their goals, while increasing our own Sustainability efforts in accordance with the Global Compact and its principles.

Thank you for joining us in this journey toward improving every life.

We perceive buildings and structures as breeding grounds of different experiences and emotions where creative breakthroughs are achieved and lives are saved. Architecture is a backdrop to all of these experiences. The design is the first building block, it all starts from there. It's transformative. Our design mantra is the way of the people.

Services include:
Architectural Planning
Exterior Designing
Interior Designing
Landscape Designing

Exterior Design

A dilapidated exterior discourages people who see it. A paint job, elaborated roofing, windows and a lot more additions like porches can make the exterior of your home enticing. Imagining or virtually designing your home can be done by you – given the fact the at this computer age, this can be easily prepared, but it takes a professional to truly 'plan', 'design' and 'construct' it; and we, MAF GROUP can help you with this. We can turn your virtual dream of exterior design into reality – and do it better and safer for you and your family

At the end of Grey Structure you'll be able to recognize and use the basic interior design principles used by every interior designer to create a great design, and who knows maybe you'll also save some money, or start a new career! Now let's begin with the beginning, and understand what interior design is ...!

"Interior design is the process of shaping the experience of interior space, through the manipulation of spatial volume as well as surface treatment. Not to be confused with interior decoration, interior design draws on aspects of environmental psychology, architecture, and product design in addition to traditional decoration.

MAF GROUP as a company who is considered a professional in the field of interior design or one who designs interiors as part of their job. Interior design is a creative practice that analyzes programmatic information, establishes a conceptual direction, refines the design direction, and produces graphic communication and construction documents. In some jurisdictions, interior designers must be licensed to practice."

NS DESIGN STUDIO

MAF GROUP vision is to foster meaningful connections between people and plants through the creation of unique installations

No one would like to live in a place that doesn't have trees or plants anywhere. Even big urban areas still preserve trees and plants. They do that by landscaping. This way, they are able to preserve nature even if modern architecture were already added to the structures. There would be hardscapes- concrete flooring, stone pathways and wood decks but you will always see plants around. That is why good landscaping is needed to create the balance.

Investing for landscaping accessories is a luxury for some but for others, it is part of their hobby and in giving back to nature the care it deserves.

MAF GROUP would love to implement sustainable landscape for every project with following missions

- Preserve nature.
- Conserve natural resources.
- Secure inhabitants.
- Create a setting for living.
- Makes a more comfortable environment.
- Sets lot limitation.
- Achieves outdoor function.
- Preserve the natural feel.
- Creates coherence with nature and man-made elements.
- Visual appeal and aesthetics.

INTERIOR FINISHES

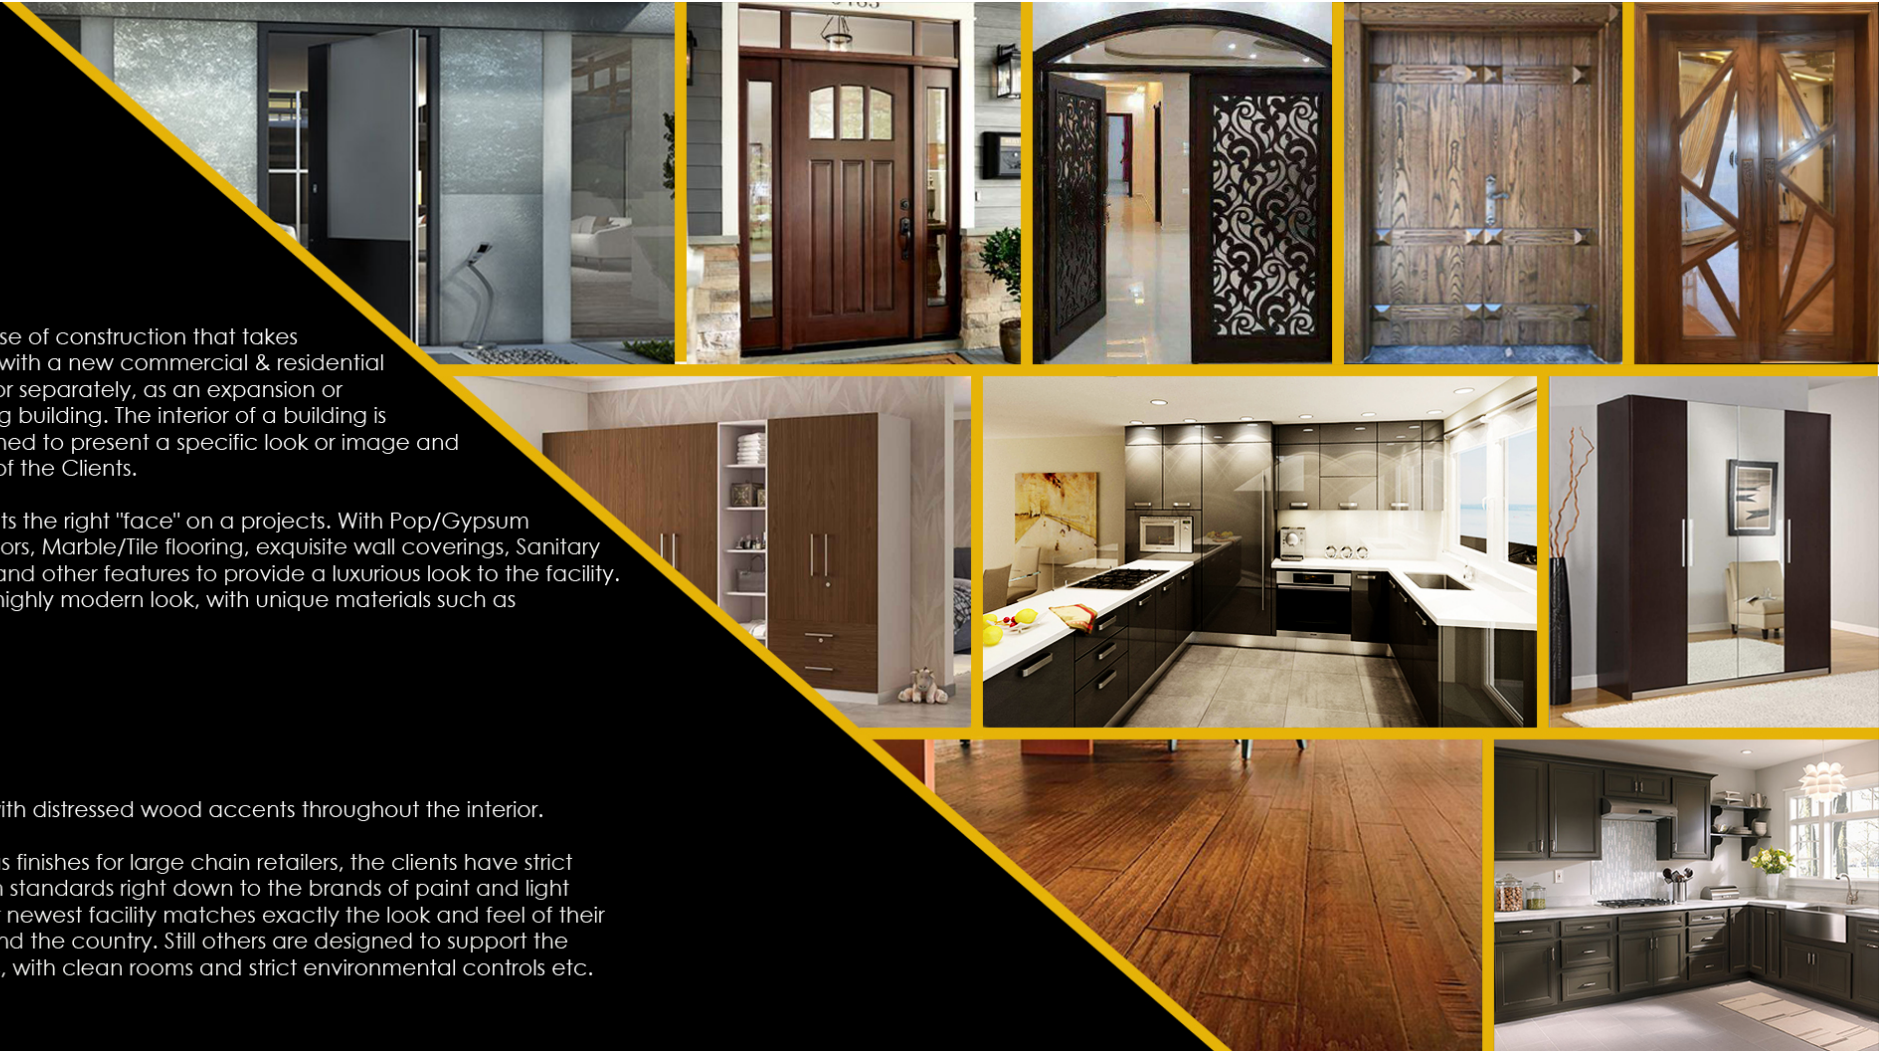

Interior Finishes A phase of construction that takes place in conjunction with a new commercial & residential construction project or separately, as an expansion or upgrade to an existing building. The interior of a building is constructed and finished to present a specific look or image and support the function of the Clients.

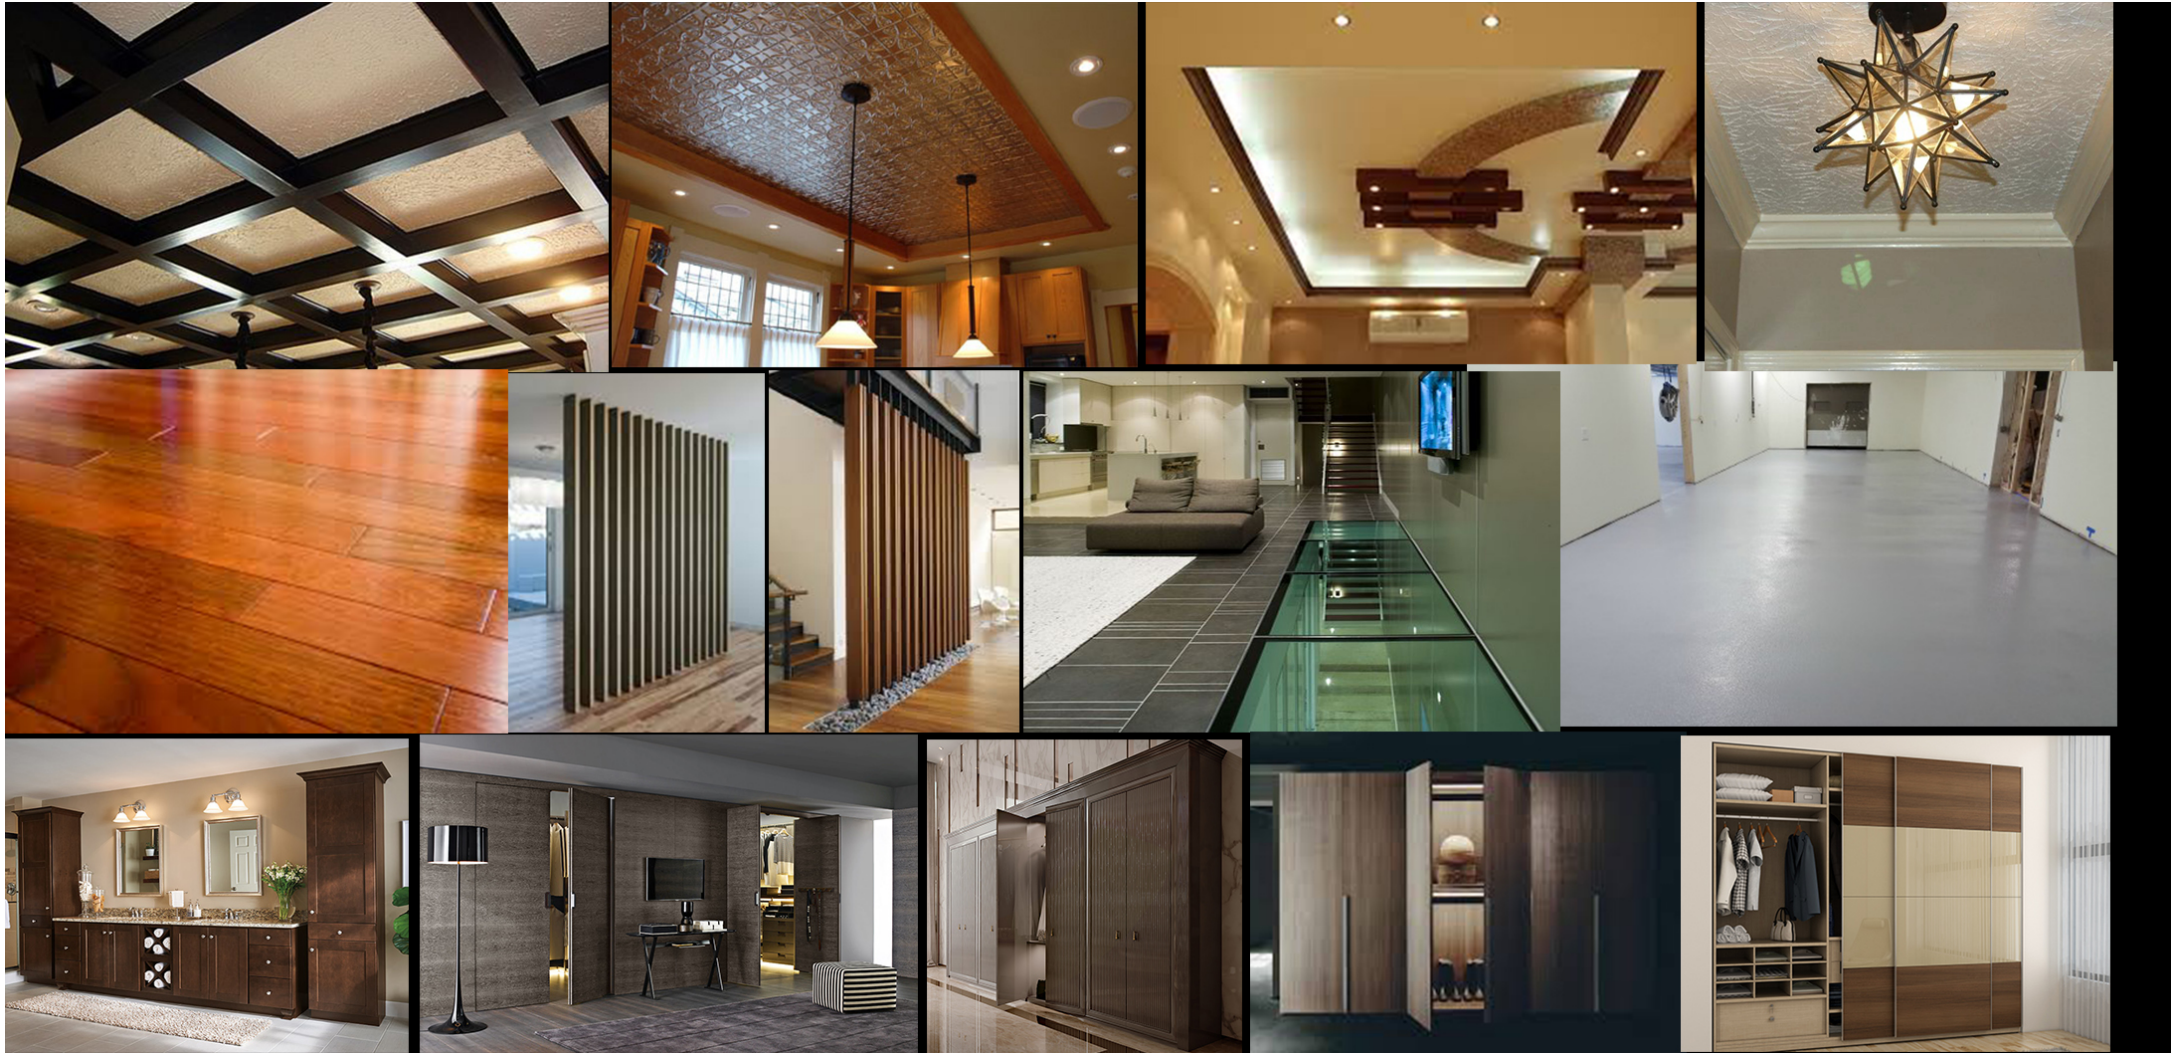

The interior finishes puts the right "face" on a projects. With Pop/Gypsum Ceiling, stone-tiled floors, Marble/Tile flooring, exquisite wall coverings, Sanitary fixtures, Accessories ,and other features to provide a luxurious look to the facility. Some clients want a highly modern look, with unique materials such as

- Solid Wooden Doors
- Modern Kitchen
- Wooden Ceiling
- Wooden Flooring
- Wooden Louvers
- Wardrobes

Rustic appearance with distressed wood accents throughout the interior.

In other cases, such as finishes for large chain retailers, the clients have strict schedules and design standards right down to the brands of paint and light fixtures to ensure their newest facility matches exactly the look and feel of their other properties around the country. Still others are designed to support the function of the clients, with clean rooms and strict environmental controls etc.
